

# INTERIOR TARP PROTECTION .COM

## PROTECTING YOUR ASSETS FROM THE INSIDE

### TARP PROTECTION

### TRUSS CLEANING

With the assistance of an air compressor, ITP specialty crews remove all dirt and debris loosened by roofing work from lighting, ductwork and trusses.

### WATER DIVERSION

*Over  
30 Years  
of Industry  
Expertise!*

**NO Project  
Too Large or  
Complex!**

Interior Tarp Protection prevents re-roofing and re-modelling dust, debris and water from interfering with a business' daily operations during roofing installations.

ITP utilizes a homegrown and proprietary process for planning, tracking and managing even the largest tarp protection project.

ITP uses a wide assortment of clear polyurethane tarp, ranging from three- to 10-mil. When necessary, ITP also utilizes special fire retardant and anti-static products.
